PROFILE

Junior Software Engineer focused on building technology that solves real world problems. Experienced in full stack development, systems integration, cloud based systems, and API driven applications, with hands on experience in Python,Java,Javascript, Python, REST APIs, and Microsoft cloud /AWS with additional Shopify theme development experience.. Skilled in developing secure, scalable, and reliable solutions, from backend services and third party integrations to cloud infrastructure. Driven by continuous learning, innovation, and creating meaningful impact through technology.

EXPERIENCE

Computro Solutions , *Software Engineering Intern* 02/2026 – 08/2026 | Pretoria, Gauteng

- Develop and support backend and frontend applications, REST APIs, and integrations across services.Assist with AWS deployments, environment configuration, testing, debugging, and release workflows.
- Collaborate through Git-based workflows, code reviews, technical documentation, and unit testing; use AI tools to support problem-solving.
- Collaborate using Git-based workflows, participating in code reviews and team based software delivery.
- Write unit tests and assist with quality assurance to improve application reliability.
- Support deployment automation, environment configuration, and release management.

CloudSec Network , *Cloud Security Intern* 07/2025 – 11/2025 | Remote, United States

- Recognised as a top student and progressed from Trainee to Intern after completing the foundational AWS build track.
- Supported AWS workloads using ECS Fargate, S3, CloudFront, IAM, and CloudWatch.
- Provisioned infrastructure with Terraform and documented configurations, monitoring, and security findings.

Activate Academy , *Software Developer Trainee – E-commerce Development* 10/2026 – 10/2026 | Remote

- Customised Shopify storefront themes and product sections using Liquid, HTML, CSS, and JavaScript.
- Built AJAX cart updates with customer feedback and a free-shipping progress indicator.
- Implemented a recently viewed products feature using browser local storage; tested responsive layouts and theme settings.
- Used Git/GitHub, Shopify CLI, and Theme Check during development and validation

EDUCATION

WeThinkCode_, *Diploma in Software Engineering* 09/2024 – 12/2025 | Johannesburg, Gauteng

Naledi Secondary School, *Grade 12* 12/2021 | Johannesburg,Gauteng
Matriculated with Bachelor's Pass

TECHNICAL SKILLS

Languages (Python, Java, SQL, JavaScript, HTML, CSS) | **Backend** (REST APIs, FastAPI, Flask, Django, Spring Boot, SQLAlchemy, JWT) | **Frontend & E-commerce** (React, Bootstrap, Vite, Shopify Liquid, Shopify CLI) | **Cloud & DevOps** (AWS (IAM, S3, CloudFront, ECS Fargate, CloudWatch, Lambda, Route 53), Docker, Terraform, Linux, Nginx) | **Tools** (Git, GitHub, GitLab, Postman, VS Code, IntelliJ IDEA, Maven) | **Data & Messaging** (PostgreSQL, SQLite, Redis, Kafka, SQS, DynamoDB, ActiveMQ)

CERTIFICATIONS

AWS Cloud Solutions Certificate — CloudSec Network |

Professional Microsoft Security Essentials — Microsoft |

Job Simulations (Standard Bank, JPMorgan Chase & Co) — Forage

VOLUNTEERING & LEADERSHIP

Junior Data Engineer, *Dubs Mathematics Programme* 03/2026 – Present | South Africa
- Support data requirements, ETL/ELT pipelines, SQL queries, and data reliability troubleshooting.

Events Coordinator, *WomenThinkCode_* 05/2025 – 12/2025 | Johannesburg, Gauteng
- Helped organise workshops, hackathons, and community events promoting women's participation in technology.

PROJECTS

Banking API System — REST banking service , *Python · FastAPI · Pydantic · SQLAlchemy · SQLite*
- Built CRUD account endpoints and transaction handling with validated request/response models and a database layer

Distributed systems infrastructure design — scaling and failure analysis ,
Linux · Nginx · HAProxy · Kafka · Redis · PostgreSQL · Shell
- Built a two-module service that accepts requests offline and replays them through a message broker when connectivity returns

Offline-First Government Service System — resilient service queueing ,
Java · Spring Boot · ActiveMQ · Maven (multi-module) · Docker
- Designed a six-tier architecture and wrote provisioning scripts and technical notes covering scaling and failure scenarios

Northfold E-commerce Product Page, *HTML, CSS, JavaScript, Shopify*
- Developed a responsive e-commerce product page with product details, pricing, and interactive product options.
- Built a clean, accessible interface optimised for mobile and desktop screens.
- Used Git and GitHub for version control and project collaboration.
